Read the text and answer the questions.(3.5)

We have different school subjects for example English, biology, geography, history and etc.

We get familiar with different parts of body and learn how they work in biology. We learn new things about heart, blood, plasma and etc. heart is the most important organ in our body which pump the blood all around the body. Blood carry white cells and red cells and plasma to send oxygen to different organs.

We study about Earth and other planets in geography. they go around the Sun in different orbits. They have different colors and sizes. we can see the planets with a telescope.

Jupiter is the largest one. It has more than sixty moons. Learning about planet is really interesting.

Write T for true and F for false.

We learn about our body in history  
Plasma is the most important organ  
Saturn is the largest planet

Answer the questions

1. what does a heart do in our body?

.....

2. what do we learn in biology?

.....

3. how many moons does Jupiter have?

.....

Goodluck.
