Reading(5points).

Fear is an emotion similar to anxiety. A person who fears something does not want it to happen, because they think something bad will happen to them if it does. Fear is the body's way of protecting itself from possibly dangerous situations. If we did not fear things then we would probably be dead because when we fear something like jumping off a cliff, then we would probably not do it, so if we jumped off a cliff then we would probably die. But if we have a fear of jumping off the cliff when we would not do it so we would not die.

Public speaking is considered the number one fear of all people. Death come in second. I wonder how giving speeches is more fearful than death. Well, Public speaking comes in different ways for many people. Some are scared to give a speech in front of a big **crowd**, and others are not. But at some point in their lives, everybody will have to get over that fear and nervousness to achieve the goal of Public speaking.

Giving a speech is actually not that hard as it sounds. Most people have trouble with it because they have not prepared correctly. The best and easiest way to prepare yourself for speaking is to practice, practice, practice. Nothing will prepare you more. When you have practiced enough you will speak as you are just talking normal.

2) the underlined pronoun "it" in line 6 refers to.....

1/ jumping off a cliff
2/ fear
3/ fear of jumping
4/ cliff

3) the writer believes that.....

- 1/ Giving a speech is more fearful than death
- 2/ Public speaking is easier than it seems
- 3/ noting can prepare us more
- 4/ speech is just the normal talking

4) the underlined word “achieve” in the 2nd paragraph is closest in meaning to.....

- 1/ overcome
- 2/ reach
- 3/ raise
- 4/ involve

5) in order to succeed in public speaking , we need to.....

- 1/ prepare ourselves by practicing
- 2/ choose an excellent and easy way
- 3/ speak as we are just talking normal
- 4/ concentrate on our fear and nervousness
